

Dr. Sid, Trustees Advance College Expansion

DURING THE ANNUAL TRUSTEES' MEETING, DR. SID OUTLINED PLANS FOR THE CAMPUS EXPANSION. EXAMINING THE ARCHITECT'S BLUEPRINTS ARE (LEFT TO RIGHT) DR. NELL K. WILLIAMS, SENIOR VICE PRESIDENT/DEAN OF STUDENT AFFAIRS; DR. SID; FRANK STRICKLAND, LIFE COLLEGE GENERAL COUNSEL; MORRIS W. LUTES, VICE PRESIDENT OF BUSINESS AND FINANCE; AND DR. REBECCA RAY, TRUSTEE.

Life College is an institution on the move! At the same time that we opened our third clinic this spring, the trustees were signing off on further campus expansion and Dr. Sid was pledging \$1 million for construction of an Olympic-caliber track.

In March, the new Marietta North Clinic joined the Life College Outpatient Clinic and the Luckie Street Clinic in providing quality chiropractic care to the community. The 12,000-square-foot clinic is almost as large as the outpatient clinic on campus. The facility has all new equipment in its 25 adjusting rooms, two instrumentation rooms, four CRC rooms, UA lab, and two X-ray rooms. There is a large student prep room and even larger student X-ray analysis room, a waiting room with child's playroom, records' room, insurance room, faculty and student lounges, clinic director's office and 80 lockers for students and faculty.

According to Vice President for Clin-

ics Dr. Hubert Hitchcock, more than 400 students have indicated that they will conduct their student practice at the new clinic in Northern Marietta. The satellite clinic was paid for, in part, by donations raised during the 1993 Annual Fund/Phone-A-Thon campaign.

Life's governing board met in Sarasota, Florida, in February and approved plans for a new 400-meter lap track, expansion of the Sport Science Center and the Basic

Science Center and conversion of the recently purchased McMillian property next door to the Administrative building. The College will proceed by taking the proper steps to insure an 8-10 million bond issue for the construction.

Dr. Sid Williams brought the idea of a pre-Olympic training facility a step further by pledging \$1 million toward construction of an outdoor track. Approved by Life's trustees, this pledge is a follow-up to a 1991 landmark agreement between the City of Marietta and Life College for the College to develop and pay for a running trail through its campus and adjacent city park land. The agreement includes the provision for the lap track for community and College use.

Construction of the track will begin in April, but to complete the facility Dr. Williams told members of the Cobb Chamber of Commerce that an additional \$500,000 for irrigation and lighting must be raised in the community.

A five-mile running trail and two ver-

**SID E. WILLIAMS,
B.S., D.C.**

President and Founder

The mission of Life College is to educate and to prepare men and women as productive members of society; to prepare them to serve as role models and leaders within their chosen field and their community; and to encourage them to demonstrate positive social values in their lives.

The School of Chiropractic at Life College is dedicated to a philosophy of service to its students, faculty, the community and the chiropractic profession.

The college provides sound academic programs in each of its approved educational categories: doctor of chiropractic program; master of science in sports health science; bachelor of nutrition for the chiropractic sciences; bachelor of business administration; undergraduate core curriculum; and a diploma program to train chiropractic technicians.

Life College does not discriminate in the application, retention or promotion of students based upon race, creed, color or sex, national origin or physical handicap. Life College is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award the doctor of chiropractic, master of science and bachelor of science degrees. The College's School of Chiropractic is accredited by the Commission on Accreditation of the Council on Chiropractic Education.

EXPANSION - *continued from page one*

THE FINAL "ADJUSTMENTS" WERE MADE TO THE NEW SATELLITE CLINIC AND IT OPENED JUST IN TIME FOR SPRING.

tical sand dunes are already in use, paid for by the College. The community and Life's students use the facility as well Olympic and Olympic hopeful athletes from Russia, Mexico, Australia, Germany, Ireland and England, who are training for the upcoming 1996 Games.

"In the future with approval of the Mayor and Coun-

cil of the City of Marietta, we plan to add seating around the lap track for the comfort of spectators," said Dr. Williams. Future use for the lap track beyond local, regional and state-wide competition includes such events as soccer, the Special Olympics, NAIA and international-level track and field.

Life Charts Through Two Decades

"We have graduated 6,000 students, and we'll have 10,000 alumni out there when all who are now enrolled graduate," announced Dr. Sid Williams during the Founder's Day assembly on January 25, 1994.

"We are carrying on the principles and traditions of the founder D.D. and developer B.J. — the tradition that has made this profession great," Dr. Sid said, focusing on the institution's importance for the chiropractic profession. He

warned the group that if chiropractic continues to move toward the mixer mentality then the profession will follow the same destiny as naturopaths.

During its 19th anniversary year of opening the College and 20th anniversary of its charter, Life College is celebrating a host of recent achievements including a record-setting enrollment, a new degree program and continued success in its athletic programs, including designa-

tion of the College facilities as a pre-Olympic training site.

"As we approach two decades of operation, Life College continues to expand its superior academic and athletic opportunities," declared Dr. Sid Williams. "Our mission at Life College is to maintain excellence in all aspects of higher education, including academics, research, athletics and community service."

Life College, chartered in 1974 as Life Chiropractic College, officially began classes with just 22 students on January 20, 1975, under the leadership of Dr. Williams. As classes began on January 3rd this year, enrollment reached an all-time high of 3,548 stu-
