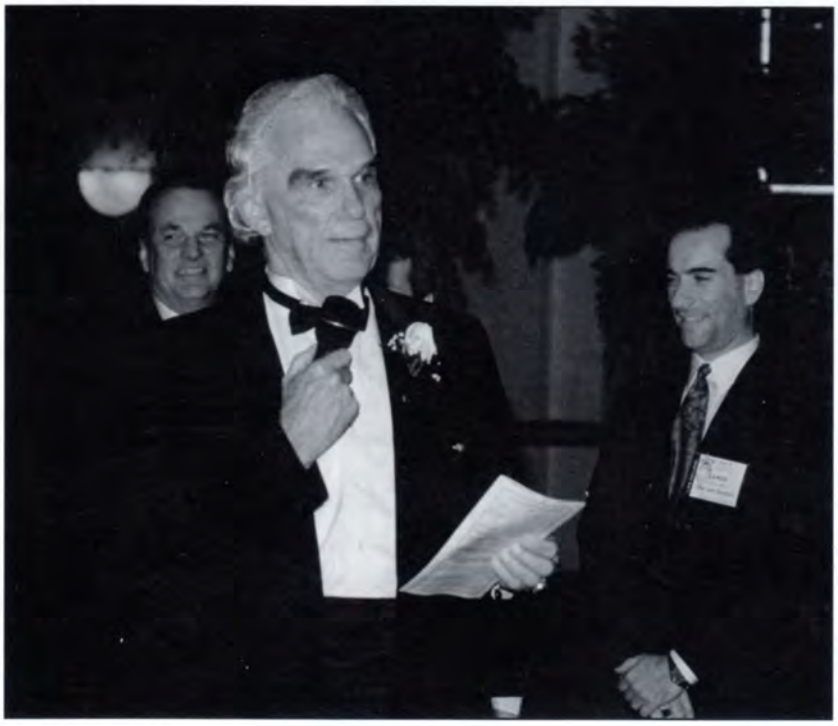
LIFE
VOLUME XII 20th ANNIVERSARY ISSUE NUMBER 6

Homecoming Celebrates 20 Years of Educational Achievement



Our founder and president who made it all happen toasted the achievements of Life's early pioneers: the Day One students, first graduating class, Day One faculty and Day One trustees.

Unparalleled...that is how to describe Life College's first 20 years. From 22 students in 1974 to 4,000 in 1994, today Life boasts the largest School of Chiropractic in the world. In honor of the 20th anniversary, Homecoming, held the first weekend of November, was a special tribute to all alumni and friends who have been a part of Life's proud heritage.

Alumni and friends of the College returned to Marietta for a weekend of postgraduate education seminars, an anniversary banquet, basketball, rugby, soccer, cross country events and class reunions. An electric excitement permeated the Homecoming crowd, which had much to celebrate this year including the kick-off of the profession's Centennial celebration.

Life College's Founder and President Dr. Sid E. Williams set the tone for the "Toast the Twentieth" with a keynote philosophy address to a Homecoming crowd of 2,000. Dr. D.D. Humber, senior vice president for development, introduced his life-long friend and colleague. "For 45 years I have witnessed chiropractors in this profession and I can truthfully say there is no one in our lifetime who has given the effort, energy, commitment and dedication in seeing that the chiropractic priniciple that is espoused at this college is carried forth than this individual."

Reflecting on the early days of the College up to the present, Dr. Sid extended special recognition to those students, faculty, administrators, staff and trustees who were with Life College on "Day One." "It takes brave, visionary people to enter a school with no classrooms," he said, commending the first students who entered the College before the warehouse building had been transformed into an educational facility.

Dr. Sid reminded the group of chiropractors of their purpose. "The world is awaiting what you know. As B.J. said, 'It (chiropractic) is bigger than law. It's bigger than medicine. It's the biggest idea that I know of.' That idea built Life College."

See Special Center Spread Saluting Life's First 20 Years

The Dream Unfolds . . .

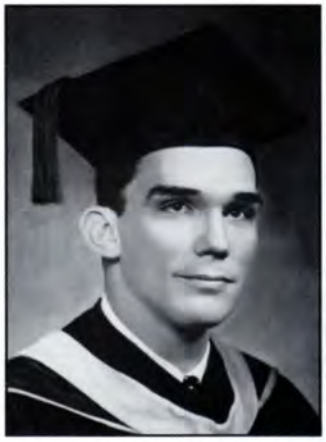
"The purpose of Life College and, eventually, Life University, is to train young people from all walks of life...not only to become skilled doctors of chiropractic, but also become meaningful human beings whose innate goodness will touch and affect all who come in contact with them. In this, our 20th anniversary year, we are very proud of the orginial 22 students who formed the Day One Class and all those who have followed in their footsteps."

— Dr. Sid E. Williams, Founder and President

Life's first 22 students have pioneered the way for more than 7,000 graduates of the College. Front row, Tom Folgrum, Steve Warfield, Dr. Sid, Wynett Scott, Debbie Flynn, Jennifer Brandon Peet. Back row, unidentified, unidentified, Gary Craft, unidentified, David Taylor, Sandy Hopkins, Stan Yarnot, Mike Ungerank, Randy Markey, Doy Ott, deceased; unidentified, Bill Kelly, Hugh Brotherton, Fain Pendergrass, Jerry Baugham, Jim Fambrough, Mark Flynn, unidentified, Art Johnson and Steve Atwood.

"Nothing Happens Unless First A Dream"

Dr. Nell Kimbrough Williams graduated from Palmer College in 1956.



Dr. Sid E. Williams graduated from Palmer College 18 years before he would open his chiropractic college.

Two Decades of Life

Chiropractic...a dream born 100 years ago. As the dream became a reality, so did the dream of Dr. Sid E. Williams, founder and president of Life Chiropractic College.

Love of Humanity

While Sid Williams attended the Georgia Institute of Technology, he was a first string defensive end on the varsity football team. He suffered a football injury while playing in the 1951 Championship Orange Bowl game and received a series of chiropractic adjustments that would change the course of his life.

Knowing what chiropractic had done for him, he decided to become a doctor of chiropractic. Then and there, Dr. Sid's dream was born...That dream today is a leading institution of its kind...Life College and the educational quality and philosophy for which it is world renowned.

After graduating from Palmer College in 1956 with his fiancee, Nell Kimbrough, Drs. Sid and Nell set out to serve humanity through chiropractic. Within several years their combined professional expertise led to establishing one of the largest chiropractic practices in the nation with 18 clinics in the Southeast.

Because of Dr. Sid's and Dr. Nell's dedication to educating the public about the benefits of chiropractic, Si-Nell Publishing Company was founded. Later Drs. Sid and Nell organized a training and educational program for chiropractic professionals who wanted to learn how to become more dedicated, self-disciplined doctors, imbued with the spirit of service for the public.

In 1964, Dr. Williams' lifelong friend and fellow Palmer graduate, Dr. D.D. Humber joined Drs. Sid and Nell and within two years brought together a forceful body of chiropractic professionals dedicated to the purpose of service, education and research for chiropractic. The Life Foundation and later the Ladies for Life organizations were born.

Today's Chiropractic, a journal with worldwide circulation, was established in 1972. It is now published under the auspices of Life College.

It was at this time Dr. Williams knew the chiropractic profession needed a center for learning, a chiropractic college in an ideal geographic location. It needed the essentials of Dr. Williams' philosophy of Lasting Purpose...to give, to love and to serve. It needed the vitality of Life itself. It needed to be Life Chiropractic College.

Imbued With Philosophy

With a student body of 22, Life Chiropractic College held its first official ribbon-cutting ceremony on January 20, 1975. Within two years Life Chiropractic College received Correspondent Status with the Council on Chiropractic Education, established the Chiropractic Technician's Program and had an enrollment of 325 students. In December 1977, the first class of 35 doctors graduated.

LCC received accreditation from the CCE in 1985, becoming the first chiropractic college to go through every level of the accreditation process required by the CCE. Life received Candidate for Recognition Status from the Southern Association for College and Schools (SACS) in 1981 and full accreditation in 1986.

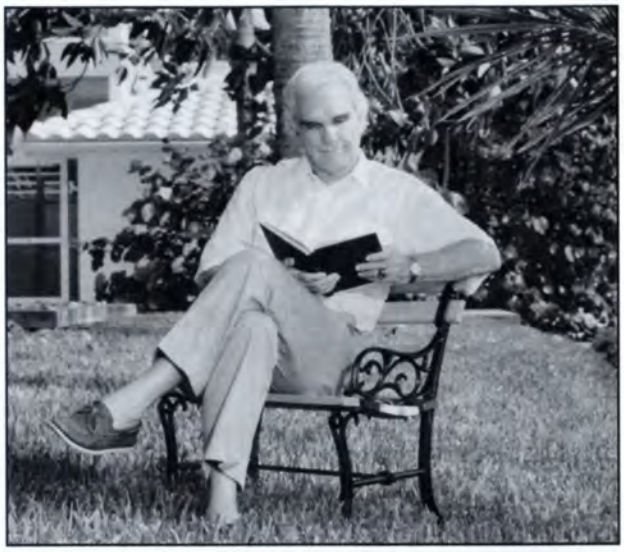
In furthering his dream and philosophy, Dr. Williams knew the time had come to spread the chiropractic message throughout the world. He founded the Life Around the World (L.A.W) program to open dialogue with the health officials of every country in the world. Designed to recruit and promote chiropractors as primary health care providers, the L.A.W. program has been extremely successful in both establishing research clinics internationally and in training citizens of other countries to become doctors of chiropractic. In 1993 Life formed an alliance with the World Health Organization to explore research into the effectiveness of chiropractic care for low-back pain.

Extending his leadership within the profession, Dr. Williams was elected the seventh president of the International Chiropractors Association (I.C.A.) in 1982, the oldest chiropractic association in the world founded by B.J. Palmer in 1926. Today Dr. Sid is chairman of the ICA's board of directors.

As current events effect the future of chiropractic, Life Chiropractic College also recognized the importance of preserving the history of the past and the memories of the pioneers who have contributed so much to its growth. In 1980, Life Chiropractic College acquired B.J. Palmer's winter residence in Sarasota, Florida, and

The Administration Building houses the offices of the President and other executive offices.

The Student Center, with its idyllic setting, is a perfect reprieve from the stresses of coursework.



Relaxing on the grounds of the B.J. Palmer - Sid E. Williams Chiropractic Embassy Compound, Dr. Sid takes in one of the many chiropractic artifacts preserved at the home of the developer of chiropractic.

Homecoming 1990 allowed alumni and friends to share in the excitement of the College's completed $14 million expansion. From left are Dr. D.D. Humber, Dr. Nell, Dr. Sid, Chairman of the Board of Trustees the Rev. Carl Standard, Nancy Hill, Dr. Mildred Kimbrough, Miss Missouri and the late Marietta Mayor Joe Mack Wilson.

Dr. Nell Williams, who has been a member of the ICA since her student days at Palmer, received the ICA's first "Woman of the Decade" award in 1991. Presenting the award are ICA President Dr. Jim Gregg (left) and past president Dr. Fred Barge.

The construction of the Nell K. Williams Learning Resource Center more than tripled the available space for this vital heart of the academic process — the library.

has restored it for the purpose of sharing chiropractic's history not only with future generations of chiropractors, but with the general public as well. Today the B.J. Palmer - Sid E. Williams Chiropractic Embassy Compound serves as a testament to the strong foundation built by B.J. and continued by Dr. Sid.

Focus on the Future

By fall of 1983, Life Chiropractic College had become in nine years one of the largest colleges of its kind with more than 1,800 students. With enrollment figures increasing, the immediate need was for additional classrooms, laboratories and faculty office space.

With a far-reaching vision, Dr. Williams instituted a five-phased, $70 million Master Plan for campus expansion projected to be completed within a ten-year period of time. Nearing completion now, the Life complex offers outstanding facilities for providing the best in chiropractic training.

Phase I of the Master Plan was a $700,000 center for the teaching and training of chiropractic techniques. Life's second official ribbon-cutting ceremony was held on April 27, 1984 for the 11,000 square foot Technique Center.

Further development of Life's dynamic campus expansion included the continued renovation of Annex B, additional parking and the completion of the multipurpose sports activity field in Spring 1985. The construction of the field was made possible in part from the proceeds of the first Run For Life in July 1984. The 5K and 10K community outreach event celebrated its 10th anniversary last year.

The vision of Life University gained momentum in 1989 with a $14 million campus expansion. The need for the building drive grew out of Life's drive to expand its role as the spearhead of chiropractic education in this century. The College became one of the world's first chiropractic institutions to offer undergraduate pre-chiropractic courses. Beginning in 1990 biology was added to the basic science course offerings making it possible for many students to transfer to Life after completing their first year at another institution. In addition to the Doctor of Chiropractic degree, Life College began offering an accredited Bachelor of Science in Nutrition for the Chiropractic Sciences degree. With the addition of a School of Undergraduates Studies, Life changed its name to better reflect its expanded programs and degree offerings. While chiropractic remains the College's central focus and guiding philosophy, its role in higher education has taken on many new facets.

Today, the College has added a School of Graduate Studies, offering a Master's in Sports Health Science that at-

tracts both athletic trainers and physiologists as well as chiropractors who want to concentrate on sports chiropractic. In addition, the School of Undergraduate Studies is now offering a Bachelor of Business Administration degree and a Bachelor of Science in Nutrition for Dietetics.

New programs demand new facilities, and Life's campus expansion and renovation began in 1989. The renovation of Annex B created a 65,000 square-foot Basic Science Center to provide the finest facilities for the basic sciences, chiropractic sciences and the nutrition program. Life also more than tripled the size of the Nell K. Williams Learning Resources Center, an important step toward providing students with the very best academic tools for their education. A 450 foot skybridge was built over Barclay Circle to connect the main campus to the new 38,500 square foot Sports Science Center. The opening of the facilities was celebrated at a special Homecoming ribbon cutting in 1990.

During the second decade of Life's existence, the College has been a national force in a number of sports. Athletes attracted to natural health care have formed nationally-ranked teams of rugby, basketball and track and cross-country. In 1984, the rugby club became Life's first national champion in the Graduate Division, and in 1994 both rugby and basketball were runners-up in the national championships. John Bartlett became Life's second national champion in 1993, winning the National Association of Intercollegiate Athletics' national marathon. To meet the stature of our athletes, Life built world-class facilities, including a five-mile running trail and a pair of 50-foot sand dunes, the first of its kind.

Excellence in Education

As Life celebrates its 20th anniversary, the College enrolls 4,000 students in the School of Chiropractic, School of Undergraduate Studies and School of Graduate Studies and is in the midst of constructing new facilities and purchasing existing buildings to accommodate this ever-growing student population. Fall 1994 enrollment in the School of Chiropractic reached 3,062, an all-time high for chiropractic colleges.

Students are able to refine their techniques in a recently opened 2,800 square foot Student Clinic with 35 adjusting tables as well as three spacious and well-equipped Outpatient Clinics... one on the Marietta campus, one in downtown Atlanta and the newest one in North Marietta. Construction has begun on a $1 million stadium, which is being built on the upper field and is attracting attention from countries all over the world whose athletes are preparing for the 1996 Summer Olympics in Atlanta. Three buildings have been purchased on Barclay Circle for administrative and faculty office, in order to free up more space for classrooms. Dr. Sid's vision also includes a Ph.D. in Health Care Sciences, an expanded world-class research facility, a women's basketball team and a performing arts center.

While Dr. Sid has been a controversial figure during his 40 years of service to the profession, in the past few years his achievements have been given their just due. He has been recognized throughout the profession as the "Defender of

On the momentous day of Life's opening, Drs. Sid and Nell look on as Marietta Mayor Dana Eastland and the Chiropractic Queen of Posture cut the ribbon.

The saying "two heads are better than one" is certainly apt when describing Drs. Sid and Nell, shown sharing his achievement as ICA Chiropractor of the Year in 1985.

Life's first student, Dr. Stan Yarnot, joined Dr. Sid at the celebration of Life's 20th anniversary.

Receiving special recognition during the 1994 Homecoming celebration was "Day One" faculty member Dr. Richard Fitzgerald. He was joined by his wife, Ellan Fitzgerald.

Joining Drs. Sid and Nell at our 20th anniversary celebration were "Day One" trustees (left to right) Dr. John T. Boutwell, Phil Johnson, Dr. James Sigafoose, Dr. D.D. Humber, chair; Dr. Ian Grassam, Dr. Robert Sottile, Dr. Don J. Armstrong and Dr. Joe Stuckey.

Dr. Sid convened with Life's original faculty back in 1974. Seated are (left to right) Dr. Charles Kalb, Dr. Ronald J. Watkins , Nancy Hill. Standing are Dr. Jeff Buncher, Dr. Gerard Clum, the late Dr. Ed Ambrose, the late Dr. Bob Chadwick, unidentified, Winona Dawkins, Dr. Marvin Buncher.

Member's of Life's first graduating class returned to Toast the Twentieth. Life's first student, Stan Yarnot holds the '77 class composite. He is flanked (left to right) by Dr. Debbie Pogrelis, Dr. Frank Bowling, Dr. Bill Willis, Dr. Nell, Dr. Mike O'Daniel, Dr. Wynett Scott , Dr. Sanford Hopkins, Dr. Jim Burnham, Dr. Sid and Dr. Gary Craft.

Chiropractic" for his singular focus and steadfast perseverance in carrying the torch for principled chiropractic. As the foremost chiropractic educator of this generation, the founder and president of Life College has taken a dream and turned it into a thriving reality, with the benefits resounding throughout the world.

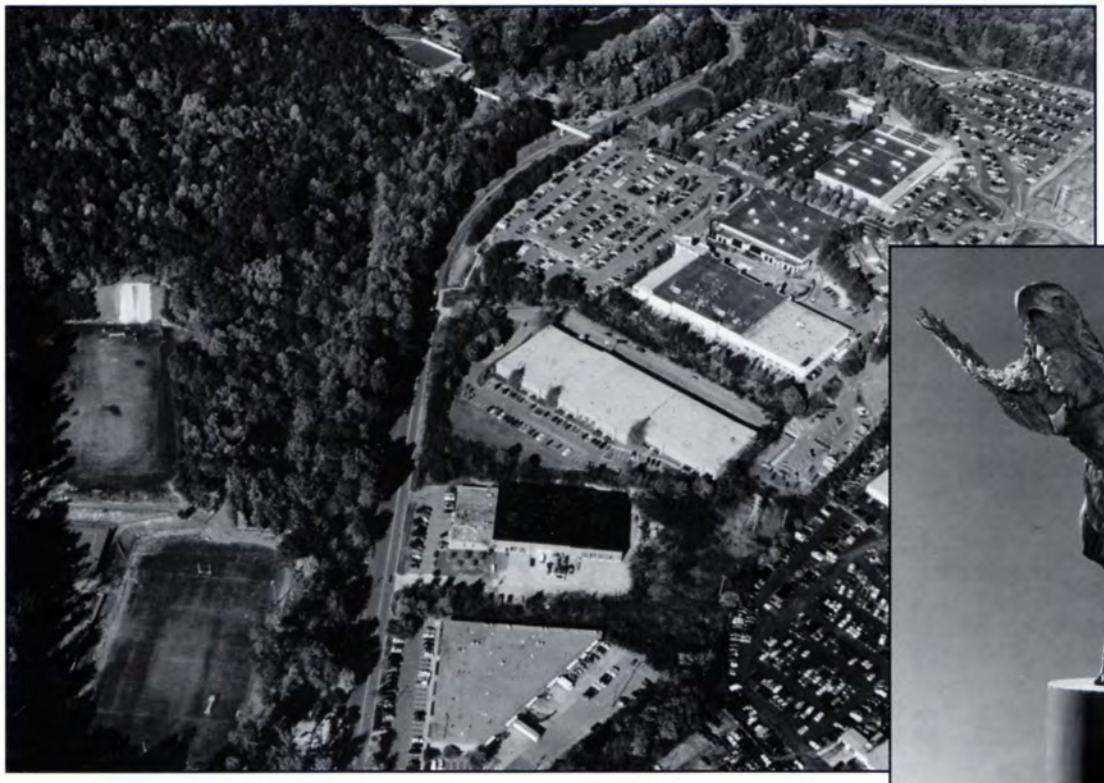
The Dream Fulfilled . . .

At Life College the dream has indeed become a reality. Today, this modern state of the art campus unfolds in a crescendo of modern buildings and determined purposeful students, faculty staff and administrators bent on achieving the ideal of Lasting Purpose. The Life campus accommodates 4,000 students within the School of Chiropractic, School of Undergraduate Studies and School of Graduate Studies. Construction has recently begun on a $1 million stadium on the upper athletic field, which will be home to a professional soccer team. The College has purchased two warehouse/office buildings on Barclay Circle and the McMillian Research building, to open up space for additional classrooms. Student clinicians are already taking advantage of a 2,800 square foot new Student Clinic.



The bronze Adisi Eagle statue soars above the Sports Science Center and presides over the campus, symbolizing Dr. Sid's vision and guiding principle.

The former Annex B was completely renovated and rebuilt from the ground up and is now the state-of-the-art Science Center.
